

Now, Vodafone has set an even more aggressive timeline to use Open RAN for urban.

Africa: The African continent poses a unique commercial and moral challenge for telecom service providers. A large number of the African population is still out of the telecom network . it remains one of the most under-penetrated regions in the world, with the primary 2G network yet to reach over 110 million people (as per the GSMA report). In addition, the Average Revenue Per Unit (ARPU) continues to be extremely low, and the telecom service providers have a tough challenge yet to reach
